

# SHOWER HINGE

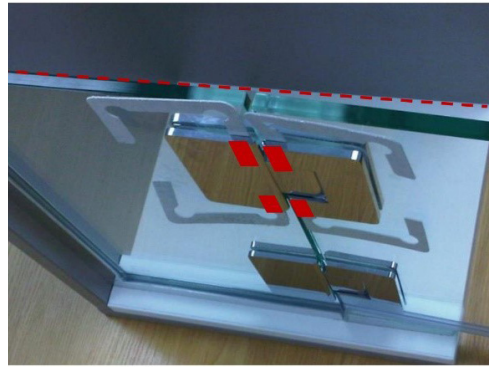

## Trouble Shooting Guide

crest  
showers

### PROBLEM 1

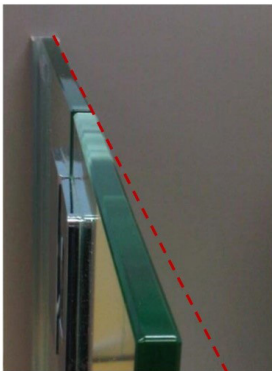

**Problem #1** Door is stopping slightly too far inside the shower (too far to the Right)

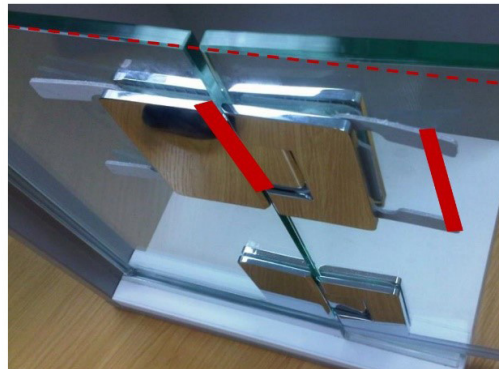

**Solution #1** Loosen door and insert extra gaskets as shown. Use masking tape to secure in position. Once door is closing correctly, trim off protruding gaskets.

### PROBLEM 2

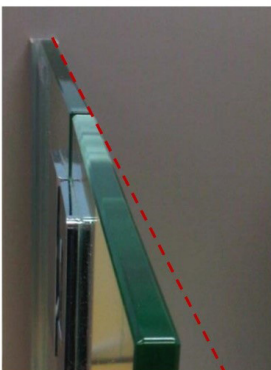

**Problem #2** Door is stopping slightly too far outside the shower (too far to the Left)

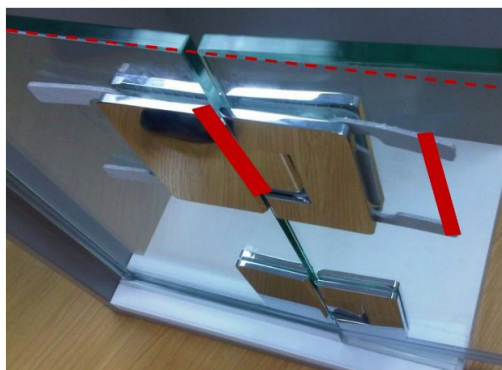

**Solution #2** Loosen door and insert extra packers as shown. Use masking tape to secure in position. Once door is closing correctly, trim off protruding gaskets.

### PROBLEM 3

**Problem #3** Fixed panel and door don't line up correctly

**Solution #3** Add an extra gasket as shown. Fixed panel and door will now line up correctly. Note gaskets can only be added to outside of hinge.
