

FLOATING GLASS SHELVES INSTALLATION INSTRUCTIONS - WITH BRACKETS

PARTS LIST

INCLUDED

1. 2 x Brackets, Screws & wall plugs

NEEDED

1. Level
2. Drill
3. Tape Measure
4. Marker
5. Silicone
6. Screwdriver

If two shelves are installed in the same corner, ideal shelf heights off the floor are 1200 & 1600mm. When installed in different corners, an ideal height is 1400mm off the floor.

INSTALLATION INSTRUCTIONS

1. PREPARATION

Clean area shelf is being installed, ensuring it is free of any dust, soap scum, cleaners or any other substance.

2. HEIGHT

Measure and mark the height where the shelf is to be installed on both walls.

3. PLACEMENT

Place brackets on shelf and tighten in desired position. *Brackets should be placed in central position on shelf edge.*

4. MARK

Hold shelf up at correct height and Mark above each bracket on wall.

5. DRILL

Use level to ensure straight and-drill holes at correct points on wall

6. SILICONE

Fill hole with silicone , insert wall plugs.

7. INSTALL

Screw brackets onto wall.

They will need to be removed from shelf beforehand.

IMPORTANT: Protect floor until shelf is secured in case of the unlikely event that shelf is dropped.
